

Powering Sydney's Future

POTTS HILL TO ALEXANDRIA TRANSMISSION CABLE PROJECT COMMUNITY NOTIFICATION

Construction update

TransGrid is installing a new underground electricity cable from Potts Hill to Alexandria. The Powering Sydney's Future project will help ensure a safe, reliable and affordable energy supply for Sydney's CBD and surrounding areas. You can view a map of the cable route at www.transgrid.com.au/psf.

We delivered a letter on 12 July to advise you of upcoming work activities in your area starting from 19 July. However, this work was postponed due to the construction pause required under the NSW Government COVID-19 public health order announced on 17 July.

We will restart these activities in your area from next week, and want to assure you that our work will continue to be done in accordance with the NSW Health advice.

The latest letter we sent you with information about the upcoming work activities in your area is available on our website. Please visit www.transgrid.com.au/psf and go to *Document library*, then *Work notifications*. The map showing local traffic changes is provided overleaf.

Updated work completion date

- **Sydenham Road and Brereton Avenue (including the Neville Street and Centennial Street intersections):**

Trenching work on Sydenham Road for TransGrid's transmission cable requires Ausgrid (the local electricity network operator) cable to be moved. To do this, a trench for an Ausgrid cable is also required between the electrical kiosk in Brereton Avenue and Sydenham Road.

The work is being delivered by the same contractor working on TransGrid's Powering Sydney's Future project and was originally scheduled for completion in September 2021. Due to the pause in construction, we now expect to be working in Brereton Avenue and Sydenham Road intermittently from next week until **mid-October 2021**. We will keep you advised of the progress of this work.

- **Centennial Street, Neville Street and Hawkhurst Street**

Work in these locations will start from mid-August, and is still expected to be completed in **September 2021**. Please note that work will not be continuous during this period.

Work hours

We are expecting that most work can be delivered during day time work hours, from 7am to 6pm Monday to Saturday.

However, should some night work be required for trenching on Sydenham Road and Brereton Avenue, this work would be between 8pm and 6am, Sunday to Friday.

Road restoration

The road surface along our cable route will be permanently restored at a later stage in consultation with Council. Residents and businesses will receive more information about this work and when it will be done closer to the time.

For an interpreter please call **131 450** and ask them to call TransGrid on **1800 955 588**. The interpreter will then assist you with translation.

COVID-19 Safety protocols

The health and safety of our people, customers and the community and ensuring a reliable supply of electricity to NSW and the ACT are our highest priorities during the COVID-19 crisis.

TransGrid and our contractors, as a minimum, adhere to the recommendations of SafeWork NSW along with the advice of other state and federal authorities to effectively manage the risk of COVID-19 to workers and others in the work environment. This involves maintaining effective controls including social distancing, stringent hygiene and specific work planning and access protocols at our work sites.
