

# Powering Sydney's Future

## POTTS HILL TO ALEXANDRIA TRANSMISSION CABLE PROJECT COMMUNITY NOTIFICATION

### Cable installation: Scouller Street, Marrickville to Camdenville Park, St Peters

TransGrid is installing a new underground electricity cable from Potts Hill to Alexandria. The Powering Sydney's Future project will help ensure a safe, reliable and affordable electricity supply for Sydney's CBD and surrounding areas. You can view a map of the cable route at [www.transgrid.com.au/psf](http://www.transgrid.com.au/psf).

We thank you for your patience during our work so far. The next stage of work in the area involves installing the cable.

From **Monday 28 June 2021**, we will start installing underground cables between **Scouller Street, Marrickville** and **Camdenville Park, St Peters**. Cable pulling pits on **Llewellyn Street, Marrickville** and **Edgeware Road, Newtown** will be used to assist with feeding the cables through the conduits (pipes).

A cable drum behind a large delivery truck will be parked adjacent to the joint bay in **Camdenville Park**. The drum and truck together are around 4.5 metres wide when stationary and six metres wide when in use. The truck will arrive before the morning peak traffic time and turn off its engine until 7am. It will leave after cable installation has ended.

Cable installation will take up to **three weeks** to complete, weather permitting. Please refer to the map overleaf.

#### Work activities

- > Installing temporary fencing and safety barriers around the work site.
- > Tree trimming may be required to create a safe distance from our equipment (directed by a qualified arborist).
- > Excavating the ground around the joint bays using a road saw and excavator.
- > Digging a trench about two metres wide using an excavator and installing conduits (pipes).
- > Excavating small pits (six metres long by three metres wide) and installing cable pulling equipment.
- > Pulling cables through underground pipes at joint bays and ancillary pits in the road.
- > Using a pump/vacuum truck to remove water from the joint bays/cable pulling pits as required.
- > Any localised nature strip restoration work that may be necessary.

#### Work hours

Working hours are **7am – 6pm, Monday to Sunday**.

#### How will the work affect you?

- > **Sections of Scouller Street, Juliett Street, Lynch Lane and Edgeware Road will be temporarily closed to through traffic** during work hours, with traffic detours and traffic control in place for the safety of workers and road users.
- > **These streets will remain open to local residents** under traffic control.
- > 'Left in, left out' arrangements will be in place on **Juliett Street and Shelleys Lane**.
- > Residents may experience short delays when accessing their property. If we anticipate that your driveway access may be disrupted, we will inform you in advance and discuss arrangements.
- > There will be a temporary loss of street parking while work is in progress.
- > The work will generate some noise, including a generator operating at each cable installation location. We will make every effort to keep noise to a minimum.
- > An alternative route will be provided if any diversions or temporary closures of pedestrian access are required.

## Location of cable work on Scouller Street and Llewellyn Street

## Location of cable work on Edgeware Road and in Camdenville Park

### Legend

- Work areas
- ◆ Joint bays
- Cable installation pits
- Road closure and detour for non-residents
- Resident access point
- Resident access only
- ▲ Access to/from Llewellyn Street will be left in, left out only
- Cable route

## What's next

We will return to Scouller Street and Camdenville Park at a later date to join the electricity cables together, install fibre optic communications cables and open up previously installed joint bays for testing. We will keep you advised of upcoming work activities.

Once all work is complete in the area the cable is tested, we will permanently restore the road surface.

If you have any questions or concerns, please contact the Powering Sydney's Future project team on 1800 955 588 or at [psf@transgrid.com.au](mailto:psf@transgrid.com.au).

### COVID-19 Safety protocols

The health and safety of our people, customers and the community and ensuring a reliable supply of electricity to NSW and the ACT are our highest priorities during the COVID-19 crisis.

TransGrid and our contractors, as a minimum, adhere to the recommendations of SafeWork NSW along with the advice of other state and federal authorities to effectively manage the risk of COVID-19 to workers and others in the work environment. This involves maintaining effective controls including social distancing, stringent hygiene and specific work planning and access protocols at our work sites.
