

Powering Sydney's Future

POTTS HILL TO ALEXANDRIA TRANSMISSION CABLE PROJECT COMMUNITY NOTIFICATION

Construction of a cable bridge at Bedwin Road, Newtown and St Peters

TransGrid is installing a new underground electricity cable from Potts Hill to Alexandria. The Powering Sydney's Future project will help ensure a safe, reliable and affordable electricity supply for Sydney's CBD and surrounding areas. You can view a map of the cable route at www.transgrid.com.au/psf.

A construction laydown area will be established at **Camdenville Park, St Peters** from **Monday, 23 November 2020** (entrance off May Street) and used until project completion in late 2021. This area will be used for construction of a new combined cable bridge and cycleway alongside Bedwin Road Bridge. Construction of the combined cable bridge and cycleway will start in **early December 2020** after the laydown area is established. A bridge is required for the new cable to cross the railway and the cycleway will deliver a key active transport link for the Inner West community.

This notification is a summary of work to setup the laydown area and the bridge construction activities. We will keep you informed as our work in the area progresses.

Work activities

- > Establishing the laydown area at Camdenville Park. Plant and equipment will be stored in the secure temporary laydown area which will include project vehicles, storage containers, construction materials, lighting towers, generators and minor staff amenities.
- > Installing temporary fencing and safety barriers around a smaller worksite on the other side of the bridge at Edgeware Road in Newtown.
- > Piling works, including setting up a piling rig, establishing a piling platform and a safety zone.
- > Forming and pouring foundations at each end of the bridge, along with approach slabs.
- > Work to install pre-cast beams between the piers will be required outside of normal working hours during a railway line shutdown to enable the use of large mobile cranes. We will provide more information before this work is done.

Work hours

Working hours are **Monday to Saturday 7.00am to 6.00pm**. Work outside these hours will be notified separately.

How will the work affect you?

- > An increase in construction vehicles travelling to and from the sites and oversized deliveries.
- > Noise and potential light spill from the work. However, our crews will seek to limit these impacts as much as possible.
- > Intermittent noise may be heard from the cable bridge sites during pick up, laydown and use of equipment.
- > Traffic control will be in place to safely direct vehicles and pedestrians around the sites.
- > Road users may experience temporary delays in accessing local properties. There will be temporary closures of footpaths and cycleways, however we will always provide an alternative route.

COVID-19 Safety protocols

The health and safety of our people, customers and the community and ensuring a reliable supply of electricity to NSW and the ACT are our highest priorities during the COVID-19 crisis.

TransGrid and our contractors, as a minimum, adhere to the recommendations of SafeWork NSW along with the advice of other state and federal authorities to effectively manage the risk of COVID-19 to workers and others in the work environment. This involves maintaining effective controls including social distancing, stringent hygiene and specific work planning and access protocols at our work sites.
