

# Powering Sydney's Future

## POTTS HILL TO ALEXANDRIA TRANSMISSION CABLE PROJECT COMMUNITY NOTIFICATION

### Essential work only – Harmony Street, Ashbury

TransGrid is installing a new underground electricity cable from Potts Hill to Alexandria. The Powering Sydney's Future project will help ensure a safe, reliable and affordable energy supply for Sydney's CBD and surrounding areas. You can view a map of the cable route at [www.transgrid.com.au/psf](http://www.transgrid.com.au/psf).

Work recently started to join sections of cable together inside the joint bay in Harmony Street. Since then the NSW Government has paused non urgent construction work in the community under COVID-19 public health orders. This critical work to join cables is permitted to continue under those orders as the new electricity cable can be damaged if there is a delay in joining sections together after work has already started.

Once the cable joining work is finished, the joint bay will be refilled and the site secured. We expect these activities to be completed by Wednesday 28 July 2021.

We will resume work on the project as soon as possible once restrictions on construction are lifted. Thank you for your continued patience and cooperation.

### Work hours

Work hours are **7am to 6pm Monday to Saturday**. At times, work may extend beyond 6pm as the process to join the cable is continuous and must be completed on each shift.

### Contact us

If you have any questions or concerns, please contact the Powering Sydney's Future project team on 1800 955 588 or at [psf@transgrid.com.au](mailto:psf@transgrid.com.au).

### COVID-19 Safety protocols

The health and safety of our people, customers and the community and ensuring a reliable supply of electricity to NSW and the ACT are our highest priorities during the COVID-19 crisis.

TransGrid and our contractors, as a minimum, adhere to the recommendations of SafeWork NSW along with the advice of other state and federal authorities to effectively manage the risk of COVID-19 to workers and others in the work environment. This involves maintaining effective controls including social distancing, stringent hygiene and specific work planning and access protocols at our work sites.
