

# Powering Sydney's Future

## POTTS HILL TO ALEXANDRIA TRANSMISSION CABLE PROJECT COMMUNITY NOTIFICATION

### Cable installation on Pile Street and Centennial Street, Marrickville

TransGrid is installing a new underground electricity cable from Potts Hill to Alexandria. The Powering Sydney's Future project will help ensure a safe, reliable and affordable electricity supply for Sydney's CBD and surrounding areas. You can view a map of the cable route at [www.transgrid.com.au/psf](http://www.transgrid.com.au/psf).

We thank you for your patience during our work so far. As part of the next stage of the project, we will install the underground cable between the joint bays on **Pile Street (near Livingstone Road)** and **Centennial Street, Marrickville**. This work will start from **Tuesday 20 April** and is expected to take up to three weeks to complete, weather permitting. Please refer to the map overleaf.

#### Work activities

- > Installing temporary fencing and safety barriers around the work site.
- > Tree trimming may be required to create a safe distance from plant and equipment (conducted by a trained arborist).
- > Pulling electricity cable through underground pipes at joint bays in the road.
- > Using a pump/vacuum truck as required.
- > Any localised nature strip restoration work that may be necessary.

#### Work hours

Working hours are **7am – 6pm, Monday to Saturday**.

#### How will the work affect you?

- > **Pile Street and Centennial Street will remain open to local residents under traffic control.**
- > **Pile Street (between Wardell Road and Livingstone Road) and Centennial Street (between Petersham Road and Boland Lane) will be temporarily closed to through traffic** during work hours as shown on the map overleaf. Traffic detours and traffic control will be in place for the safety of workers and road users.
- > The temporary traffic lights on Pile Street will be turned off during cable installation work and residential access around the work area will be maintained by traffic controllers. When cable installation is finished we expect the traffic lights will be operating again until the cables are joined together in mid-May.
- > The cable drum behind a large delivery truck will be parked adjacent to the joint bay on **Pile Street** and is around 4.5 metres wide when stationary and six metres wide when in use. The truck will arrive before the morning peak time and turn off its engine until 7am. It will leave after cable hauling has ended.
- > The work will generate some noise, including a generator at each cable pulling pit, which we will make every effort to keep noise to a minimum.
- > There will be a temporary loss of street parking while work is in progress.
- > Road users may experience temporary delays in accessing local properties.
- > If we anticipate that your driveway access may be disrupted, we will inform you in advance and discuss arrangements.
- > An alternative route will be provided if we need to close the footpath.

#### Register for local progress updates

Are you interested in email progress updates about work in your area?  
To register email [psf@transgrid.com.au](mailto:psf@transgrid.com.au) with 'Email update' as the subject and include your name and street address.

## Location of cable work

Work will also be occurring on Herbert Street, Fairfowl Street and Pile Street west of Wardell Road from Wednesday 21 April. Please contact us if you would like more information about this work and associated traffic changes.

## What's next

There will be a series of work in Pile Street and Centennial Street until the end of June 2021 but work will not be continuous during the period. We will continue to keep you advised of the progress of work.

On Pile Street, we will return after cable installation to join the cables together, install a second joint bay and minor ancillary pits, dig a small trench to connect the electrical earthing system for the new cables and temporarily restore the road surface.

On Centennial Street, we will return at a later stage to install further cables, join the cables together, and temporarily restore the road surface.

Once all work is complete in the area and the cable is installed and tested, we will permanently restore the road surface.

## Contact us

If you have any questions or concerns, please contact the Powering Sydney's Future project team on 1800 955 588 or at [psf@transgrid.com.au](mailto:psf@transgrid.com.au).

For an interpreter please call **131 450** and ask them to call TransGrid on **1800 955 588**. The interpreter will then assist you with translation.
