

Powering Sydney's Future

POTTS HILL TO ALEXANDRIA TRANSMISSION CABLE PROJECT COMMUNITY NOTIFICATION

Cable installation at Maiden Street and Wangee Road, Greenacre

TransGrid is installing a new underground electricity cable from Potts Hill to Alexandria. The Powering Sydney's Future project will help ensure a safe, reliable and affordable electricity supply for Sydney's CBD and surrounding areas. You can view a map of the cable route at www.transgrid.com.au/psf.

We thank you for your patience during our work so far. As part of the next stage of the project, excavation of a pit near the intersection of Acacia Avenue and Wangee Road will occur in the week commencing **Monday, 22 February 2021**. Work to install the underground cable at **Maiden Street and Wangee Road, Greenacre**, will start from **Thursday, 25 February 2021**. Cable installation will take up to three weeks to complete, weather permitting. Please refer to the map overleaf.

Work activities

- > Installing temporary fencing and safety barriers around the work site.
- > Trimming trees may be required to create a safe distance from plant and equipment (conducted by a trained arborist).
- > Pulling electricity cable through underground pipes at joint bays in the road.
- > Installing cable pulling equipment in a small pit (six metres long by three metres wide), at around the half-way point between each joint bay.
- > Using a de-watering pump/vacuum truck as required in wet weather. Any localised nature strip restoration work that may be necessary.

Work hours

Working hours are **7.00am – 6.00pm, Monday to Saturday**.

How will the work affect you?

- > **Maiden Street will be temporarily closed** to through traffic between Karuah Street and Juno Parade during work hours. Maiden Street will remain open to local residents.
- > **Wangee Road will be temporarily closed** to through traffic between Roberts Road and Skyline Street during work hours. Wangee Road will remain open to local residents.
- > The cable drum behind a large truck is around 4.5 metres wide when stationary and six metres when in use. The truck will arrive before the morning peak time and turn off its engine until 7.00am. It will leave after cable hauling has ended.
- > The work will generate some noise, including a generator at each cable pulling pit, which we will make every effort to keep to a minimum.
- > There will be a temporary loss of street parking while work is in progress, and road users may experience short delays in accessing local properties.
- > An alternative route will be provided wherever any diversions or temporary closures of pedestrian and cyclist pathways are required.
- > If we anticipate that your driveway access may be disrupted, we will inform you in advance and discuss arrangements.

We will need to return at a later stage to join the cables, install some minor ancillary pits and associated cables and temporarily restore the road surface. Once all work in the area is complete we will permanently restore the road. We will notify you ahead of these work activities. In the meantime, please get in touch if you have any questions.

Location of cable work

COVID-19 Safety protocols

The health and safety of our people, customers and the community and ensuring a reliable supply of electricity to NSW and the ACT are our highest priorities during the COVID-19 crisis.

TransGrid and our contractors, as a minimum, adhere to the recommendations of SafeWork NSW along with the advice of other state and federal authorities to effectively manage the risk of COVID-19 to workers and others in the work environment. This involves maintaining effective controls including social distancing, stringent hygiene and specific work planning and access protocols at our work sites.

For an interpreter please call **131 450** and ask them to call TransGrid on **1800 955 588**. The interpreter will then assist you with translation.
