

Powering Sydney's Future

POTTS HILL TO ALEXANDRIA TRANSMISSION CABLE PROJECT COMMUNITY NOTIFICATION

Cable installation: Charles Street, Addison Road and Scouller Street, Marrickville

TransGrid is installing a new underground electricity cable from Potts Hill to Alexandria. The Powering Sydney's Future project will help ensure a safe, reliable and affordable electricity supply for Sydney's CBD and surrounding areas. You can view a map of the cable route at www.transgrid.com.au/psf.

We thank you for your patience during our work so far. The next stage of work in the area involves installing the cable.

From **Wednesday 16 June**, our crews will open up the previously constructed joint bays and cable pulling pits on **Addison Road** and **Charles Street**. The joint bays and cable pulling pits will be used for the cable installation process.

From **Monday 21 June**, we will start installing the underground cable between **Charles Street, Addison Road and Scouller Street**. The cable truck will be located on Charles Street and Scouller Street adjacent to the joint bays and we will use cable pulling pits to assist with feeding the cables through the conduits (pipes). Please refer to the map overleaf for location of joint bays and cable pulling pits.

Cable installation will take up to **three weeks** to complete, weather permitting.

Work activities

- > Installing temporary fencing and safety barriers around the work site.
- > Tree trimming may be required to create a safe distance from our equipment (directed by a qualified arborist).
- > Excavating the ground around the joint bays using a road saw and excavator.
- > Digging a trench about two metres wide using an excavator and installing conduits (pipes).
- > Excavating small pits (six metres long by three metres wide) and installing cable pulling equipment.
- > Pulling electricity cable through underground pipes at joint bays in the road.
- > Using a pump/vacuum truck to remove water as required.
- > Any localised nature strip restoration work that may be necessary.

Work hours

Working hours are **7am – 6pm, Monday to Saturday**.

How will the work affect you?

- > Please refer to page 2 for traffic changes and parking restrictions in place during the work.
- > Residents may experience short delays when accessing their property.
- > If we anticipate that your driveway access may be disrupted, we will inform you in advance and discuss arrangements.
- > The work will generate some noise, including a generator operating at each cable installation location. We will make every effort to keep noise to a minimum.

Traffic changes and location of work

- > There will be a temporary loss of street parking at all work areas shown on the map below. Street parking will also be temporarily removed at the intersection of **Shepherd Street** and **Chapel Street** to assist with the traffic flow while the Addison Road detour is in place.
- > **Addison Road** will remain open for motorists travelling east (i.e. from Illawarra Road to Enmore Road) at all times.
- > **Addison Road** will be closed for westbound traffic during work hours and detours will be in place on Addison Road travelling from Enmore Road to Illawarra Road. Motorists will need to detour via Victoria Road, Chapel Street and Shepherd Street.
- > **Addison Road** will be open to westbound traffic from **3pm to 7pm Monday to Friday**, and from **6pm Saturday to 6am Monday**.
- > **Charles Street** and **Scouller Street** will remain open to local residents under traffic control, but these streets will be temporarily closed to through traffic during the work.
- > Traffic detours and traffic control will be in place for the safety of workers and road users.
- > An alternative route will be provided if any diversions or temporary closures of pedestrian access are required.

Legend

- Day time work areas
- Ongoing night work area
- ◆ Joint bays
- Cable pulling pit
- Road closed. No access to Addison Rd from Enmore Rd (except at times as above)
- ← Addison Road westbound detour via Victoria Rd, Chapel St and Shepherd St
- Road closure and detour for non-residents
- Resident access only
- Cable route
- Parking removal to assist with traffic flow

A cable drum behind a large delivery truck will be parked adjacent to the joint bays on Charles Street and Scouller Street. The drum and truck together are around 4.5 metres wide when stationary and six metres wide when in use. The truck will arrive before the morning peak traffic time and turn off its engine until 7am. It will leave after cable installation has ended.

Please note, night time trenching work at the intersection of Addison Road and Enmore Road will continue from 6pm to 6am, five nights per week (Monday night to Friday night) until late June.

What's next

Following cable installation, the joint bays on Charles Street, Addison Road and Scouller Street will remain fenced off in preparation of the next stages of work. On Charles Street and Addison Road, the next stage of work involves joining the cables together. On Scouller Street, we will return to install further cables, then join them together. Work at all locations will also involve installation of smaller pits and communications cables.

We will keep you advised of upcoming work activities.

Once all work is complete in the area and the cables are installed and tested, we will permanently restore the road surface.

Contact us

If you have any questions or concerns, please contact the Powering Sydney's Future project team on 1800 955 588 or at psf@transgrid.com.au.

COVID-19 Safety protocols

The health and safety of our people, customers and the community and ensuring a reliable supply of electricity to NSW and the ACT are our highest priorities during the COVID-19 crisis.

TransGrid and our contractors, as a minimum, adhere to the recommendations of SafeWork NSW along with the advice of other state and federal authorities to effectively manage the risk of COVID-19 to workers and others in the work environment. This involves maintaining effective controls including social distancing, stringent hygiene and specific work planning and access protocols at our work sites.
