Re: North West Slopes - Project Assessment Draft Report (PADR)

Please accept this letter as a submission for the North West Slopes PADR.

On behalf of Whitehaven Coal Ltd I would like to confirm our intent to proceed with the Vickery Expansion Project. The project has received approval from the Independent Planning Commission (NSW) and EPBC approval (Federal) and will require power by **Q4 2024**. The maximum demand for the project has been calculated as **12.5MVA**.

If you have any questions, require further information, or would like to discuss, please do not hesitate to contact me.

Yours sincerely

Phil Wade
Vickery Expansion Project Manager
