

Powering Sydney's Future

POTTS HILL TO ALEXANDRIA TRANSMISSION CABLE PROJECT COMMUNITY NOTIFICATION

Overnight trenching work at Enmore Road, Marrickville

TransGrid is installing a new underground electricity cable from Potts Hill to Alexandria. The Powering Sydney's Future project will help ensure a safe, reliable and affordable electricity supply for Sydney's CBD and surrounding areas. You can view a map of the cable route at www.transgrid.com.au/psf.

Trenching on Enmore Road started in late March and we thank you for your patience during the work so far. We do apologise for not restarting in late April as planned. Our plan to restart took slightly longer than expected, however, the construction crew will begin activity again on **Sunday 9 May 2021**. We will be working from the intersection with Addison Road heading north on Enmore Road.

The crew is expected to progress at 12 metres per shift and we anticipate the work will take a further 10-20 shifts to complete, weather and ground conditions permitting.

This work needs to be completed outside standard construction hours due to high daytime traffic volumes.

Work activities

- > Delivering plant and equipment to site.
- > Trimming trees to create a safe distance from plant and equipment (directed by a trained arborist).
- > Cutting the road surface with a concrete saw
- > Digging a trench about two metres wide using an excavator and installing conduits (pipes).
- > Using a pump/vacuum truck as required.
- > Backfilling the trench and covering it with steel plates or temporarily restoring the road surface to allow normal traffic flow, and restoring the footpath and grass verge as required.

Work hours

Work hours are **6pm to 6am, Monday to Sunday**. We will work for **six consecutive nights** a week. There will be no work done on Saturday night overnight to Sunday morning.

How will the work affect you?

- > The work will be noisy at times, but we will make every effort to keep noise to a minimum by undertaking the noisiest activities before midnight, wherever possible.
- > There will be temporary lane closures to ensure the safety of workers, road users and residents, although two-way traffic flows will be maintained. Traffic control will be in place to safely direct traffic around the work area.
- > There will be a temporary loss of street parking of around 100 metres while trenching is in progress.
- > There may be temporary closures of footpaths, but we will provide an alternative route.
- > Road users may experience short delays to access local properties. If we expect your driveway access will be disrupted, we will inform you in advance and discuss arrangements.

Location of out-of-hours trenching work

What's next?

Following each night shift on Enmore Road, the road surface will be temporarily restored to allow normal traffic flow.

We expect to be working in your general area, including at Addison Road, Scouller Street, Juliett Street, Llewellyn Street and Edgeware Road, until June 2021.

Once all work is complete in the area and the cable is installed and tested, we will return at a later date to permanently restore the road surface.

COVID-19 Safety protocols

The health and safety of our people, customers and the community and ensuring a reliable supply of electricity to NSW and the ACT are our highest priorities during the COVID-19 crisis.

TransGrid and our contractors, as a minimum, adhere to the recommendations of SafeWork NSW along with the advice of other state and federal authorities to effectively manage the risk of COVID-19 to workers and others in the work environment. This involves maintaining effective controls including social distancing, stringent hygiene and specific work planning and access protocols at our work sites.

For an interpreter please call **131 450** and ask them to call TransGrid on **1800 955 588**. The interpreter will then assist you with translation.
