

Powering Sydney's Future

POTTS HILL TO ALEXANDRIA TRANSMISSION CABLE PROJECT COMMUNITY NOTIFICATION

Construction of ancillary pits Lucerne Street, Belmore

TransGrid is installing a new underground electricity cable from Potts Hill to Alexandria. The Powering Sydney's Future project will help ensure a safe, reliable and affordable electricity supply for Sydney's CBD and surrounding areas. You can view a map of the cable route at www.transgrid.com.au/psf.

As part of the project, we are installing underground fibre optic communications equipment for the monitoring and control of the new electricity cable. Ancillary pits are required for this equipment.

Work to install ancillary pits and backfill the joint bay we have already constructed at **Lucerne Street, Belmore** will start from **Wednesday 14 April 2021** and will take around two weeks to complete, weather and ground conditions permitting. Please refer to the map overleaf.

Work activities

- > Installing temporary fencing and safety barriers around the worksite.
- > Tree trimming may be required to create a safe distance from plant and equipment (conducted by a trained arborist).
- > Excavating ancillary pits up to two metres long and two metres wide either in the road, footpath or grass verge.
- > Installing precast concrete sections in the pit to form the floor and walls of the ancillary pits.
- > Excavating a narrow trench to connect the pit to the cable trench in the road or joint bay.
- > Using a dewatering pump/vacuum truck as required, particularly in wet weather.
- > Filling the joint bay with sand, and temporarily restoring the road, footpath and grass verge surface to allow normal traffic flow.

Work hours

Standard work hours are **7am – 6pm, Monday to Friday** and **8am – 1pm on Saturday**.

How will the work affect you?

- > There will be temporary lane closures to ensure the safety of workers, road users and residents, although two-way traffic flows will be maintained. Traffic control will be in place to safely direct traffic around the site.
- > The work will be noisy at times, but every effort will be made to keep noise to a minimum.
- > There will be a temporary loss of street parking while work is in progress.
- > Road users may experience short delays to access local properties.
- > There may be temporary closures of footpaths, but we will provide an alternative route for pedestrians.
- > If we expect your driveway access will be disrupted, we will inform you in advance and discuss arrangements.

Location of work

What's next

Following the installation of the ancillary pits, we will continue to install and join cables, dig a small trench to connect the electrical earthing system for the new cables and temporarily restore the road surface. Work in Lucerne Street is expected to continue for another six to eight weeks until June 2021, although construction will not be continuous during this period. We will keep you advised of these activities.

Once all work is complete in the area and cables are installed and tested, we will permanently restore the road.

COVID-19 Safety protocols

The health and safety of our people, customers and the community and ensuring a reliable supply of electricity to NSW and the ACT are our highest priorities during the COVID-19 crisis.

TransGrid and our contractors, as a minimum, adhere to the recommendations of SafeWork NSW along with the advice of other state and federal authorities to effectively manage the risk of COVID-19 to workers and others in the work environment. This involves maintaining effective controls including social distancing, stringent hygiene and specific work planning and access protocols at our work sites.
