

## Work Notification | February 2025

### Upcoming work at Gregadoo

REF: HLW-020

HumeLink is one of Australia's largest energy infrastructure projects connecting renewable energy sources to the grid and helping to put downward pressure on energy prices. The project consists of 365 kilometres of 500 kV overhead transmission lines connecting Wagga Wagga, Bannaby and Maragle and is being delivered in two sections.

The section between Wagga Wagga, Maragle and Wondalga is being constructed by UGL Engineering and CPB Contractors, working in joint venture as the HumeLink West JV.

#### About the work

We are starting work at the compound for the future Gugaa 500kV substation **from Wednesday 12 February 2025**. The compound will support the construction of the substation and be used for plant servicing; temporary storage of materials and equipment; worker offices and amenities; and parking. More information on the Gugaa substation is available at [transgrid.com.au/projects-innovation/humelink/fact-sheets](https://transgrid.com.au/projects-innovation/humelink/fact-sheets).

Work activities at the compound over the next six months will include:

- Constructing the compound access points at Livingstone Gully Road
- Survey, investigation and monitoring including biodiversity, heritage, noise, dust and vegetation
- Clearing, vegetation removal and minor earthworks
- Establishment of site facilities including worker amenities, fencing, signage and drainage
- Deliveries of equipment and supplies
- Site and equipment maintenance
- Drone and aerial photography.

All work will be carried out in line with the project [Conditions of Approval](#) available on the NSW Government Major Projects website [planningportal.nsw.gov.au/major-projects/projects/humelink](https://planningportal.nsw.gov.au/major-projects/projects/humelink).

#### What you can expect

There will be an increased number of construction vehicles across the project area during our work. The type of plant and equipment you can expect to see at this compound are generators, elevated work platforms, telehandlers, cranes, forklifts, water carts, excavators with attachments, earth moving equipment, drone cameras, heavy and light vehicles.

Machinery and equipment may generate dust, noise and vibration. We will make every effort to minimise impacts by:

- Minimising the number of machines/vehicles to be used
- Ensuring all machinery and vehicles are maintained and serviced
- Turning off machinery and vehicles when not in use
- Fitting equipment with devices to minimise noise
- Monitoring dust, noise and vibration to manage any potential impacts and change our work if required.

Traffic control will be in place when required, including temporary traffic lights, variable message signs, boom gates, signage, speed reductions and stop/slow traffic management. Please keep to the signposted speed limits, follow the direction of traffic controllers, and drive to the conditions such as slowing down in wet weather and poor visibility. For the latest traffic updates, visit [livetraffic.com](https://livetraffic.com) or download the app Live Traffic NSW.

#### When we are working

Work will take place during standard construction hours of **7am to 6pm, Monday to Friday** and **8am to 1pm on Saturdays**. If work out of these hours is required, we will contact you at least seven days before the work starts.

## Where we will be working

Work will take place at Livingstone Gully Road, Gregadoo, shown as the work compound in the map below.

## What happens next

We'll continue to keep you updated about the project and let you know of any work we're planning that might impact you. If you have any questions about the project, please contact our Community and Stakeholder Engagement team on **1800 317 367** or [humelink@transgrid.com.au](mailto:humelink@transgrid.com.au).

We welcome your feedback on the HumeLink West JV Community Communications Strategy. Visit [transgrid.com.au/humelink-west/#Strategies-Plans-and-Programs](https://transgrid.com.au/humelink-west/#Strategies-Plans-and-Programs) to view the strategy, and connect with us to have your say.

### Stay up to date with our work

Please head to [transgrid.com.au/HumeLink](https://transgrid.com.au/HumeLink) or scan the QR code to subscribe to regular updates, and for more information on the project.

## Connect with us

Transgrid is committed to working with landowners and communities through the development of HumeLink. Please connect with us for more information.
