Powering Sydney's Future

POTTS HILL TO ALEXANDRIA TRANSMISSION CABLE PROJECT COMMUNITY NOTIFICATION

Work update for Omaha Street, Belfield

TransGrid is installing a new underground electricity cable from Potts Hill to Alexandria. The Powering Sydney's Future project will help ensure a safe, reliable and affordable energy supply for Sydney's CBD and surrounding areas. You can view a map of the cable route at www.transgrid.com.au/psf.

As you will probably be aware, TransGrid has completed a number of work activities at Omaha Street, Belfield. We will return to your street soon to do the remaining work.

Remaining work

The work activities outlined below will start from Wednesday 14 July 2021 and at times will involve traffic changes as shown on the map overleaf. We expect to work on Omaha Street until late August 2021 but work will not be continuous during this period.

Excavation

We will open up the previously constructed joint bay and use CCTV to inspect the conduits we have already installed.

Testing the new cable involves a small crew lifting the lid off the previously installed communications pits, and using hand tools to monitor the cable's performance.

Permanent restoration

We will permanently restore the traffic islands and roundabout at Omaha Street and Baltimore Street, and carry out concreting work at the communications pits already installed in the road or grass verge.

Please note that the road will be resurfaced by City of Canterbury Bankstown Council. Residents will be advised by Council (or its contractor) at least 48 hours prior to work starting in Omaha Street.

Work hours

Work hours are 7am to 6pm Monday to Friday and 8am to 1pm on Saturdays.

How will the work affect you?

- At times, Omaha Street will be temporarily closed to through traffic between Baltimore Street and Varidel Avenue. Residential access will be maintained.
- Some work activities will be noisy but we will make every effort to keep noise to a minimum.
- There will be a temporary loss of street parking. We will endeavour to maximise street parking where possible.
- An alternative route will be provided if any diversions or closures of pedestrian pathways are required.
- Residents and businesses may experience short delays to access properties.
- Driveway access will be maintained where possible. If we anticipate that access will be disrupted for an extended period, we will inform you in advance.

Work activities

All activities will involve:

- > Installing temporary fencing and safety barriers.
- > Delivering plant and equipment to site.
- > Trimming trees to create a safe distance from plant and equipment (directed by a qualified arborist).
- > Using a pump/vacuum truck to remove water as required.

Excavation will also involve:

- > Excavating the ground around the joint bay using a road saw and excavator.
- > Checking recently installed conduits using CCTV equipment.
- > Covering the road with steel plates where required to maintain traffic flow.
- > Temporarily restoring the road surface to allow normal traffic flow.

Permanent restoration will also involve:

- > Restoring the traffic islands and roundabout to their existing condition.
- > Line marking the road where required.
- > Concreting work at the communications pits in the road and grass verge.

Location of work

Contact us

If you have any questions or concerns, please contact the Powering Sydney's Future project team on 1800 955 588 or at psf@transgrid.com.au.

For an interpreter please call **131 450** and ask them to call TransGrid on **1800 955 588**. The interpreter will then assist you with translation.
